## **ABOUT THE EVENT**

### **Setting the Stage for Feedback: Moodle Gradebook Setup 11:00-12:30 P.M.**

*Beginning Users:* Sessions that are designed for beginning users explore the basics of the technologies and of their implementation. A hands-on approach to learning allows participants to practice using the tools, create items that are intended to be shared with their colleagues, and engage in dialogue about implementation ideas in order to enhance teaching and learning. These sessions are geared toward participants with little to no prior training on the technologies. Participants who need a review of the tools are encouraged to attend sessions for beginning users as well.

Participants will learn how to build relationships using Moodle communication tools, discover best practices for hybrid learning environments, and more!

### **Faculty-Student Communication: Building Relationships Using Moodle Communication Tools 1:00-2:30 P.M.**

Participants will learn how to build relationships using Moodle communication tools, discover best practices for hybrid learning environments, and more!
